Q2: Reading Comprehension

Read the following passage then answer the questions below:

Artificial Intelligence, or AI, is the science of making machines and computers think and act like humans. It helps them learn from experience, solve problems, and make decisions. AI is one of the most important inventions in the modern world.

Today, AI is used in many parts of our daily life. When you talk to your phone, it understands your voice, that is AI. When Netflix or YouTube gives you video suggestions, that is also AI. Even smart cars that can drive safely and avoid accidents use AI technology. In medicine, AI helps doctors read X-rays and discover diseases more quickly. In education, AI programs can help students learn in new and interesting ways. Some schools even use AI to check homework or to teach students according to their level.

However, AI also has challenges. Some people worry that machines might take jobs from humans. Others are concerned about how much information AI systems can collect about us. That is why people must use AI wisely and carefully. In the future, AI will continue to grow and become part of almost everything we do. It can make our world smarter and our lives easier if we use it in the right way.
